

## PIKO G SmartControl<sub>wlan</sub> System

The PIKO G SmartController<sub>wlan</sub> remote is the heart of your modern PIKO G power system, whether DCC or Analog DC. It's included in the 35055 DCC Base System and also available to add wireless walk-around convenience for Analog DC Track Power. The remote features a brightly lit color display screen and comes with a high-capacity lithium battery pack, rechargeable via USB-C port on standard household USB-C chargers. **You are now free to move about your layout!**

35051 PIKO G SmartController<sub>wlan</sub> Remote

## DCC Control—Made Modern and Flexible!

This **powerful, expandable DCC system** is made specifically for the convenience of wireless walk-around control for multiple operators on a G-Scale layout. The advanced ergonomic hand controller features user-friendly controls and wireless "wlan" walk-around operation of your DCC layout through the PIKO G SmartBox<sub>wlan</sub> base unit. Up to 4 controllers can connect simultaneously via wlan to the SmartBox<sub>wlan</sub> base unit, allowing multiple operators to control trains and accessories. Up to 69 different DCC functions per locomotive may be activated. And, up to 2048 different switch and signal devices may be controlled. The 35051 is available as an add-on controller for the 35055 PIKO G SmartControl<sub>wlan</sub> DCC Base System—more fun for more operators!

### 35055 PIKO G SmartControl<sub>wlan</sub> DCC Base System 5A

- PIKO G SmartBox<sub>wlan</sub> base unit including micro-SD card
- PIKO G SmartController<sub>wlan</sub> wireless remote (35051) including rechargeable battery
- Transformer 120V / 24V DC / 5A, 2.1mm Plug (35023)

## Need More DCC Power for a Big Layout? Add up to 10 SmartBooster Sets

### 35052 PIKO G SmartBooster Set 5A

## Analog DC Track Power, with Optional Wireless Walk-Around Control

5 Amps of pure DC power for big Analog layouts. Enjoy the convenience of wireless walk-around control by simply adding a 35051 PIKO G SmartController<sub>wlan</sub>.

### Modern Analog DC Power

- Transformer 120V / 24V DC / 5A, 2.1mm Plug (35023)
- PIKO G SmartAnalogController (35053)

### Easily Add Wireless Control!

PIKO G SmartController<sub>wlan</sub> wireless remote (35051) including rechargeable battery. Remote connects via wlan to the 35053 SmartAnalog Controller to give wireless walk-around control of DC track power.

New Design!

## PIKO G SmartControl<sub>wlan</sub> System

An all-new powerful, expandable DCC system made specifically for G-Scale, with the convenience of wireless walk-around control for multiple operators.

– OR –

Enjoy the same wireless ease of control for **Analog DC track power**.

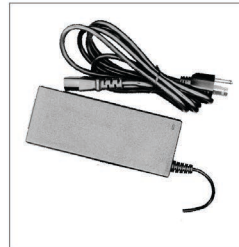

The PIKO G SmartController<sub>wlan</sub> remote is the heart of both systems. It is included in both the 35055 Base System and the "35054 Alternate" Power Set, and is available as an add-on item (35051).

This modern ergonomic hand controller features user-friendly controls and wireless "wlan" walk-around operation of your DCC layout through the PIKO G SmartBox<sub>wlan</sub> base unit. The 35051 is an add-on controller for the 35055 PIKO G SmartControl<sub>wlan</sub> Base System. Up to 4 controllers can connect via wlan to the SmartBox<sub>wlan</sub> base unit simultaneously, allowing multiple operators to control trains and accessories. Up to 69 different DCC functions per locomotive may be activated. And, up to 2048 different switch and signal devices may be controlled.

For layouts using Analog DC track power, the 35051 is also compatible with the 35053 PIKO G SmartAnalog Controller, allowing wireless walk-around control of Analog DC layouts.

The remote features a brightly lit color display screen and comes with a high-capacity lithium battery pack, rechargeable via USB-C port. USB-C charging device not included.

**You are now free to move about your layout!**
